This screenshot shows the MIT App Inventor web interface for a project named "HelloPurrStarter". The browser address bar displays "ai2a.appinventor.mit.edu/?locale=en#10310740". The top navigation bar includes links for Projects, Connect, Build, Settings, Help, and a language selector set to English. The user's email, kenjvere@gmail.com, is shown in the top right. The interface is divided into three main sections: a left sidebar with a "Built-in" category list (Control, Logic, Math, Matrices, Text, Lists, Dictionaries, Colors, Variables, Procedures, and Screen1), a central workspace, and a right sidebar with a "Designer" tab and a "Blocks" tab. The central workspace displays a logic block for "when Submit.Click" with an "if" condition: "CampoDeContraseña1.Text" equals "8822". If true, it triggers "open another screen screenName Screen2"; if false, it triggers "set CampoDeContraseña1.Text to". Below the workspace, there are "Show Warnings" buttons and a "Privacy Policy and Terms of Use" link. The Windows taskbar at the bottom shows the search bar and various application icons, with the system clock indicating 05:30 p.m. on 07/08/2026.

This screenshot shows the MIT App Inventor web interface for the same project, but now focused on "Screen2". The browser address bar and top navigation bar are identical to the previous screenshot. The left sidebar now lists "Screen2" as the selected screen. The central workspace displays a logic block for "when Botón1.Click" with a "do" block containing "call Sonido1.Play". The right sidebar remains the same. The "Show Warnings" buttons and "Privacy Policy and Terms of Use" link are also present. The Windows taskbar at the bottom is consistent with the first screenshot, showing the same system time and date.
